

**Resource File** (30 May 2012)

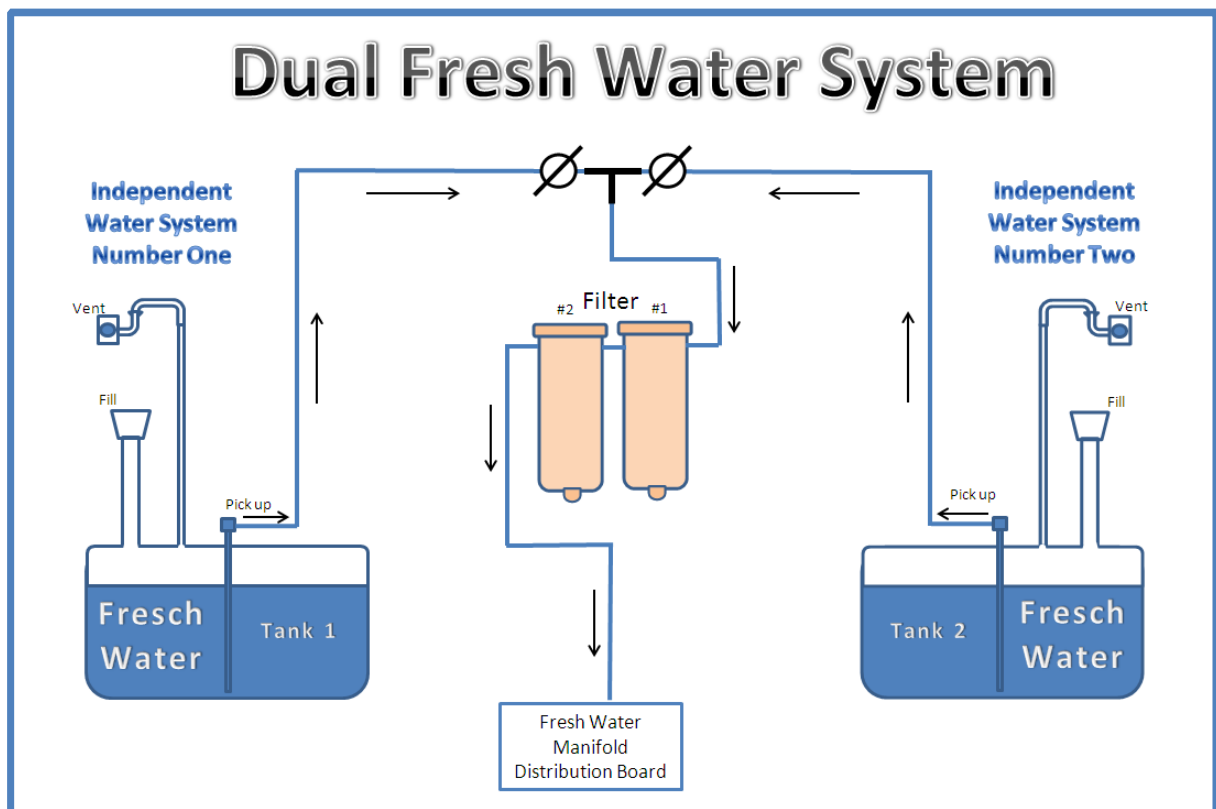

On Cool Change our Moody 45DSe we are lucky to have a Dual Fresh Water System on board that presents one of the best fresh water systems available.

What is a Dual Fresh Water System?

A... **Dual Fresh Water System...**

...provides two completely independent fresh water supply systems.

Each system has its own tank, fill, vent and pick up leading to a dual filter system. If there is ever any contamination or delivery problem in one system, then a turn of valves puts the second system on line quickly.

With the dual fresh water system one can:

- ✓ Turn both tanks on,
- ✓ Isolate either one tank from the other, or
- ✓ Turn both tanks off!
